## What is Custard?

*Custard is an old-fashioned dessert created in 1919 on Coney Island, New York. It is served about 25 degrees warmer than ice cream, and has very little air whipped in making it denser and smoother than ice cream.*

*Custard, by definition, must have 10 percent butterfat and 1.4 percent egg. This makes it approximately 90 percent fat free. Ours is a 56 year old family recipe made with good, wholesome, natural products...just like they did on Coney Island in the early 1900's.*
